OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Review of Programming Languages revealed Trends:
 - Top 3 are changing from: Bash/Shell/PowerShell, HTML/CSS, C#
 - Trend towards: JavaScript, HTML/CSS, Python
- Review of Platforms revealed:
 - Windows, Linux and Docker are popular
 - AWS is growing in popularity
- Review of Databases revealed:
 - Top 3 changing from: ElasticSearch, DynamoDB, MongoDB
 - Trend towards: PostgreSQL, MongoDB, Redis
- Review of Demographics showed:
 - Vast majority are Male (96.7%) with a Bachelor's Degree
 - Majority are located in the US and Canada
 - Majority are between 24-32 years old
- Review of Jobs and Salaries per Programming Language showed:
 - Language C has more jobs than all languages combined
 - Swift programmers make the highest salary

INTRODUCTION

- Objective was to gather data from multiple sources and analyze for trends using visualization
- Tools used included:
 - Python, SQL, Webscraping, Jupyter Notebooks, IBM Cognos Analytics, Microsoft Excel
- Data reviewed included:
 - Programming Language Trends
 - Database Usage Trends
 - Platform Usage Trends
 - Webframe Usage Trends
 - Respondents Gender
 - Respondents location by Country
 - Respondents Age
 - Respondents Education Level
 - Job Postings per Programming Language
 - Annual Salaries per Programming Language

METHODOLOGY

1. Data Gathering and Wrangling

- Sourced From Coursera IBM Data Analyst course. Dataset sources:
 - url = https://cf-courses-data.s3.us.cloud-object-storage.appdomain.cloud/IBM-DA0321EN-SkillsNetwork/labs/datasets/Programming_Languages.html
 - <https://www.kaggle.com/promptcloud/jobs-on-naukricom>
- API requests
- BeautifulSoup used for Webscraping
- Python code using Pandas, Requests, Flask, SQL

2. Data Cleaning

- Imputing values
- Adjusting data types
- Data Calculations

3. Data Visualization

- Using Microsoft Excel and IBM Cognos Analytics Dashboard

4. Data Presentation

- Using Microsoft PowerPoint and Google Slides

RESULTS

58%

of Americans say it is harder to be informed today because of the plethora of information and news sources available.

American Views: Trust, Media and Democracy, John S. and James L. Knight Foundation, January 2018

PROGRAMMING LANGUAGE TRENDS

Current Year

Top 10 Languages Respondents Worked With

Next Year

Top 10 Languages Respondents Desire Next Year

PROGRAMMING LANGUAGE TRENDS

- FINDINGS & IMPLICATIONS

Findings:

Top 3 Current Languages

1. Bash / Shell / PowerShell
2. HTML / CSS
3. C#

Implications:

From Current to Future trends

- Bash / Shell / PowerShell drops from 1st to 7th place
- HTML / CSS holds 2nd place
- C# drops from 3rd to 6th
- JavaScript is highly favored as the #1 future language
- Python ranks as 3rd

DATABASE TRENDS

Current Year

Top 10 Databases Respondents Worked With

Next Year

Top 10 Databases Respondents Desire Next Year

DATABASE TRENDS

- FINDINGS & IMPLICATIONS

Findings:

Top 3 Database Trends

1. ElasticSearch
 2. DynamoDB
 3. MongoDB
- (with MySQL closely behind)

Implications:

From Current to Future trends

- ElasticSearch falls 1st to 5th place
 - Dynamo DB falls 2nd to 10th place
 - MongoDB rises from 3rd to 2nd
 - Redis rises to 3rd place
- (with MySQL closely behind in 4th place again)

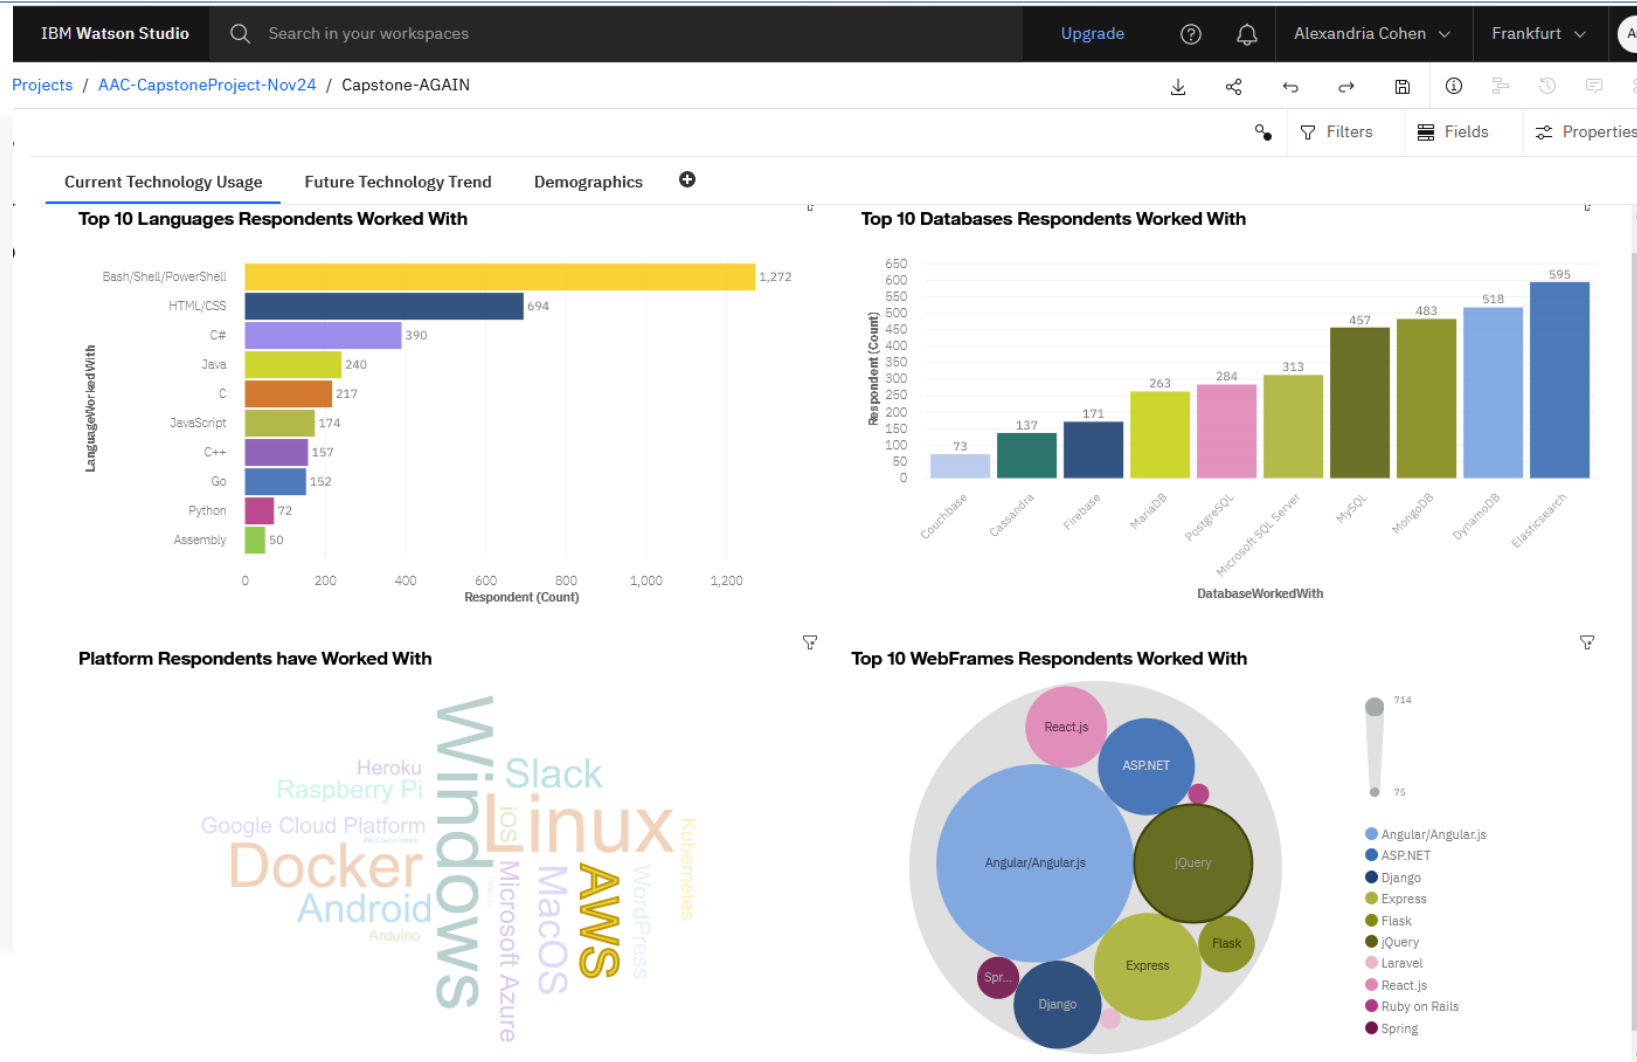

DASHBOARD

[<Link to View
Cognos dashboard>](#)

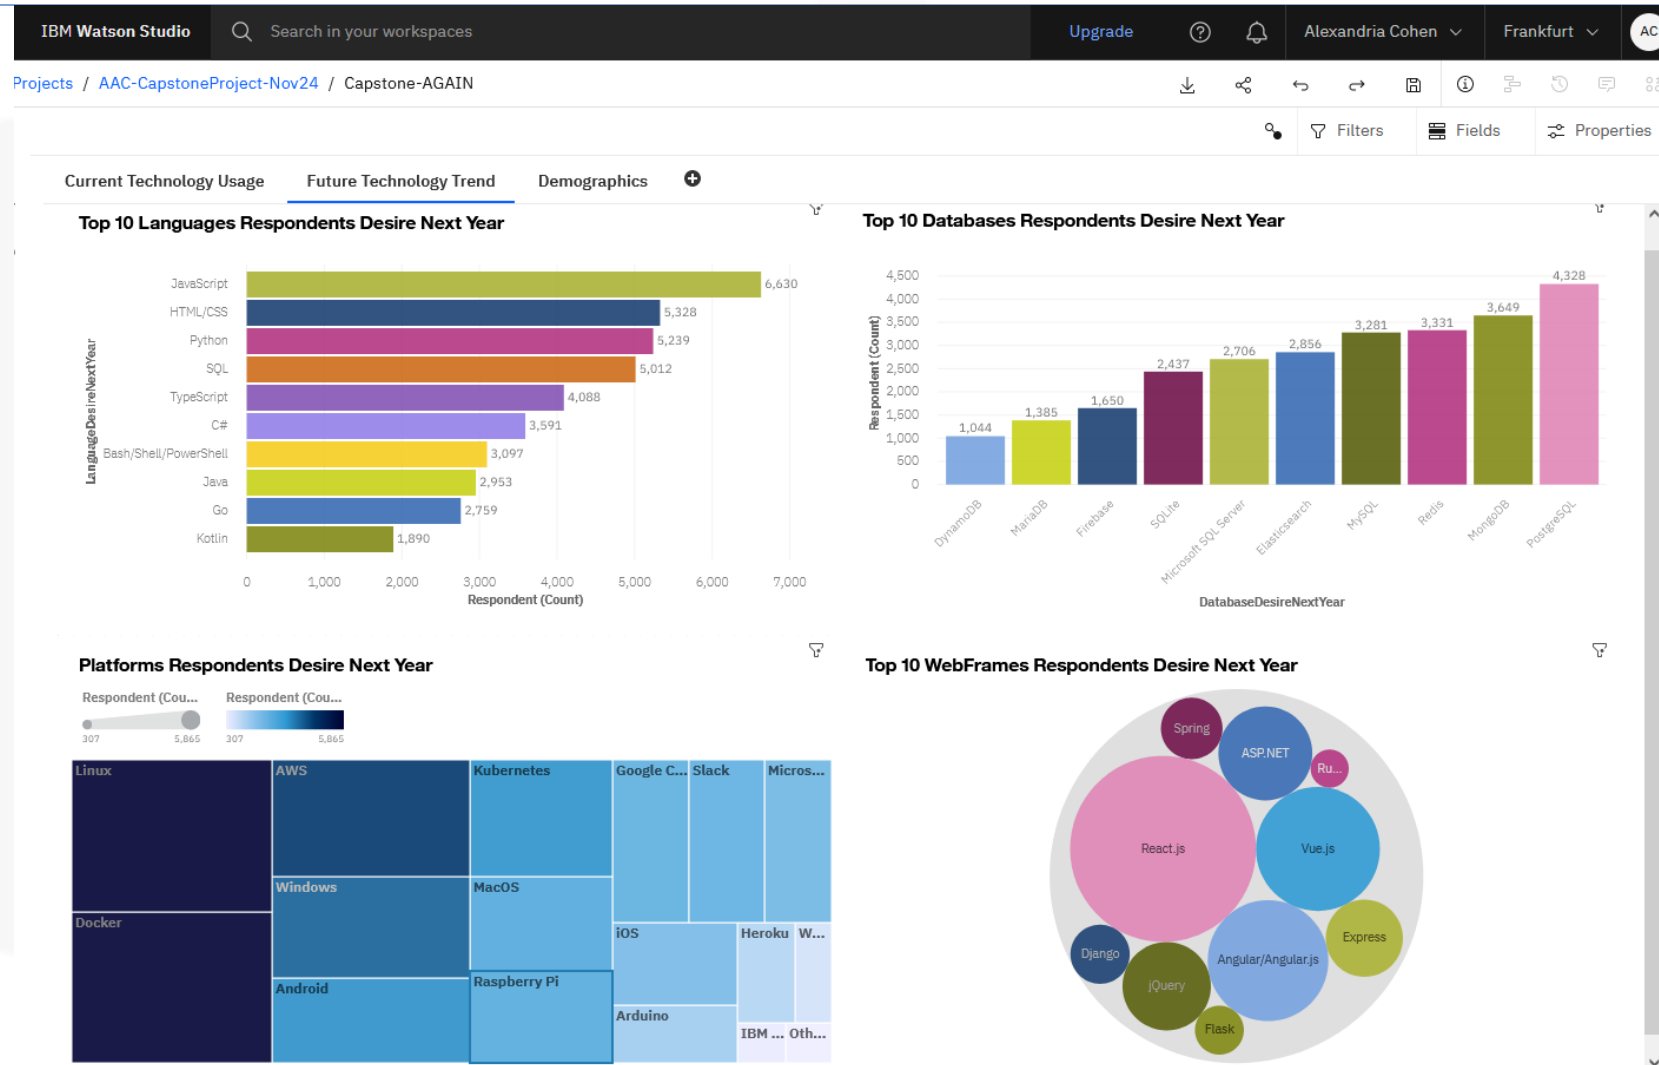

DASHBOARD TAB 1

– Current Technology Usage

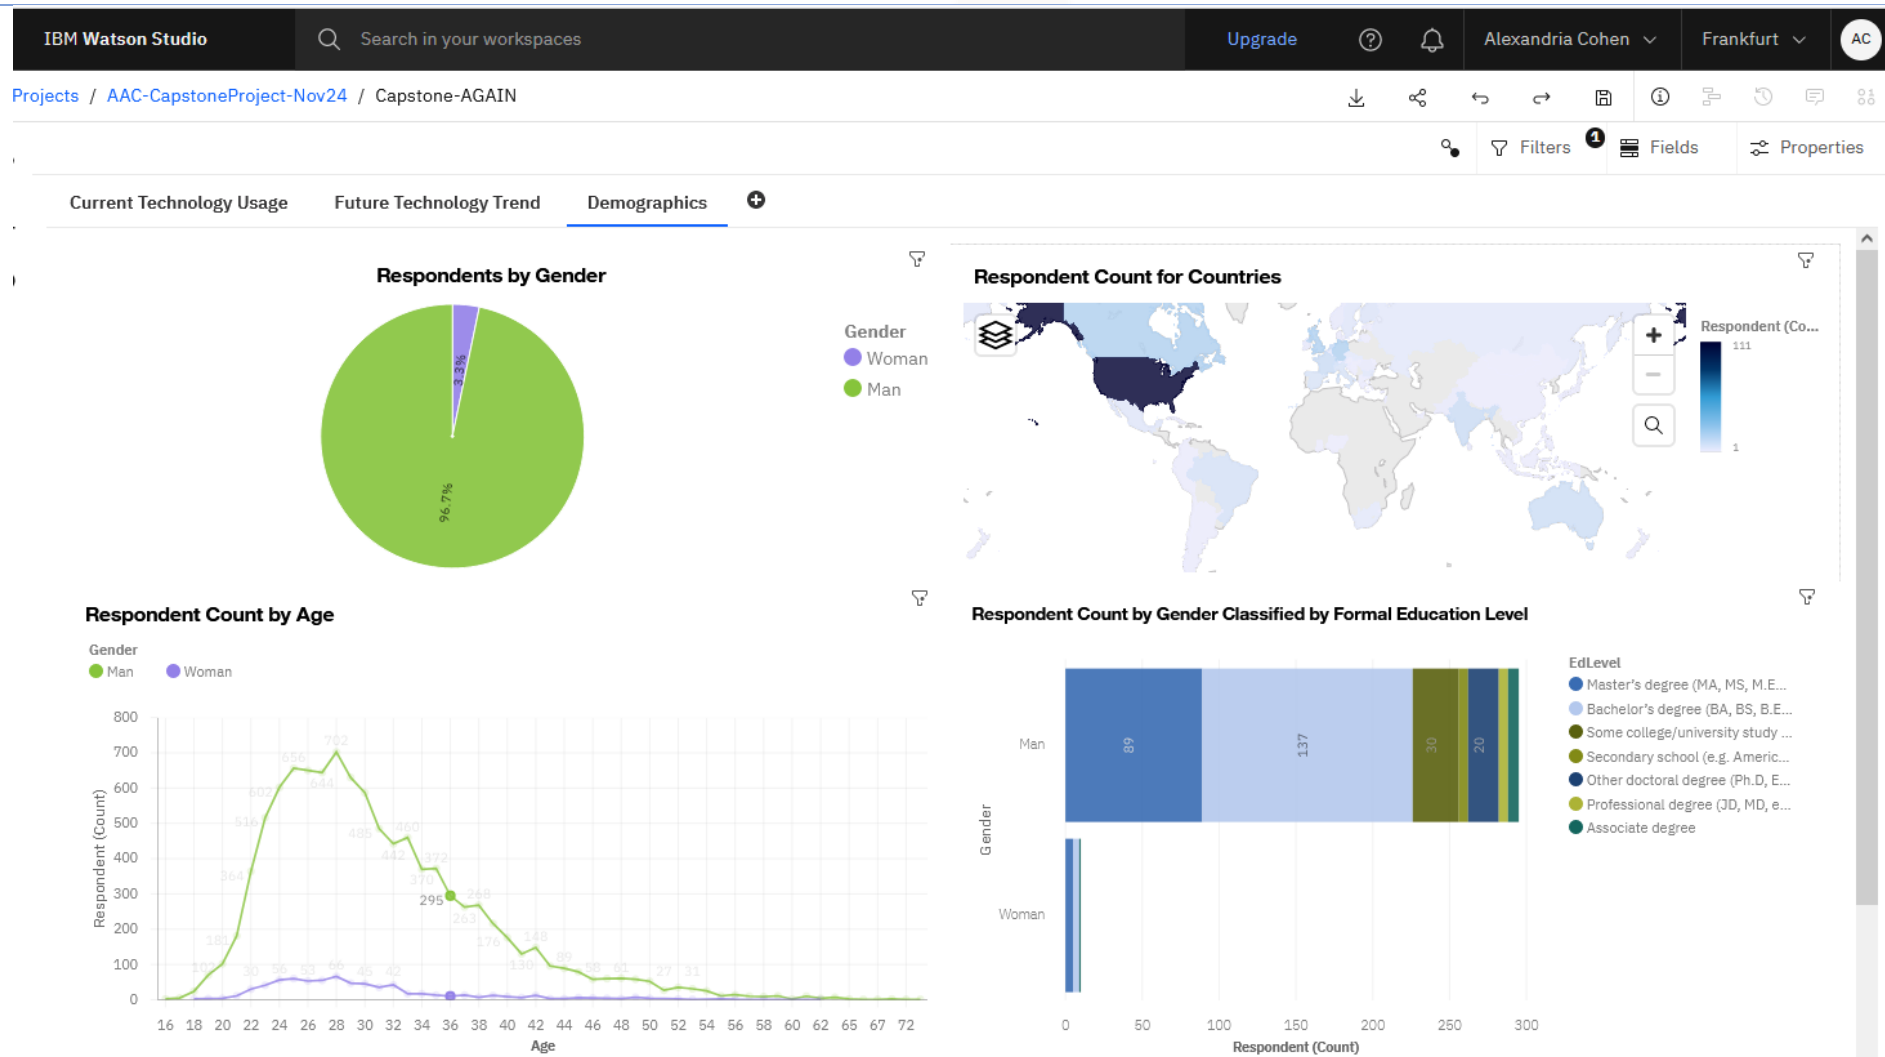

DASHBOARD TAB 2

– Future Technology Trend

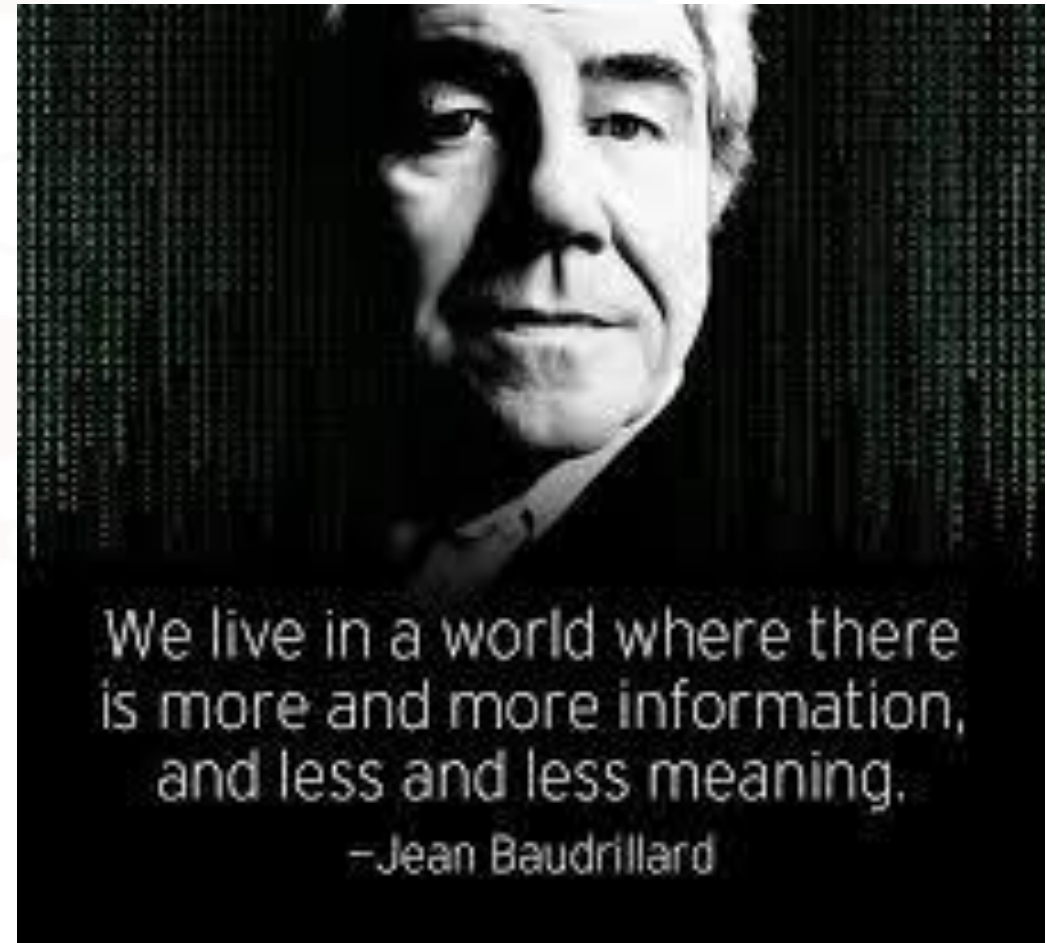

DASHBOARD TAB 3

– Demographics

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings:

- Top 3 Programming Languages are changing:
 - From: Bash/Shell/PowerShell, HTML/CSS, C#;
 - Trending towards: JavaScript, HTML/CSS, Python
- Analysis of Platform data revealed:
 - Windows, Linux and Docker are popular
 - AWS is growing in popularity
- Analysis of Database data revealed Top 3 changing:
 - From: ElasticSearch, DynamoDB, MongoDB
 - Trending towards: PostgreSQL, MongoDB, Redis
- Analysis of Demographics revealed:
 - Male Majority (96.7%) with a Bachelor's Degree
 - Majority located in the US, then Canada
 - Majority are between 24-32 years old
- Analysis of Jobs and Salaries showed:
 - Language C had more jobs than all languages combined
 - Swift programmers make the highest salary

Implications:

- Trend seen away from the Front-End programming languages as A.I. tools assist that knowledge
- **Python, JavaScript, PostgreSQL, MongoDB, Redis** and **AWS** are all growing in popularity
- Hiring will most likely focus on **Women**
- **C Programmers** have highest demand with the most job opportunities

CONCLUSION

- A.I. Tools (eg. Chat GPT) are changing the landscape and future trends in programming by making it easier to learn the front-end developer languages. This is causing a shift in the languages that programmers are desiring to learn next.
- Hiring of females is lagging in the Programming industry
- Most Programmers are in the US and Canada with a Bachelor's Degree

APPENDIX

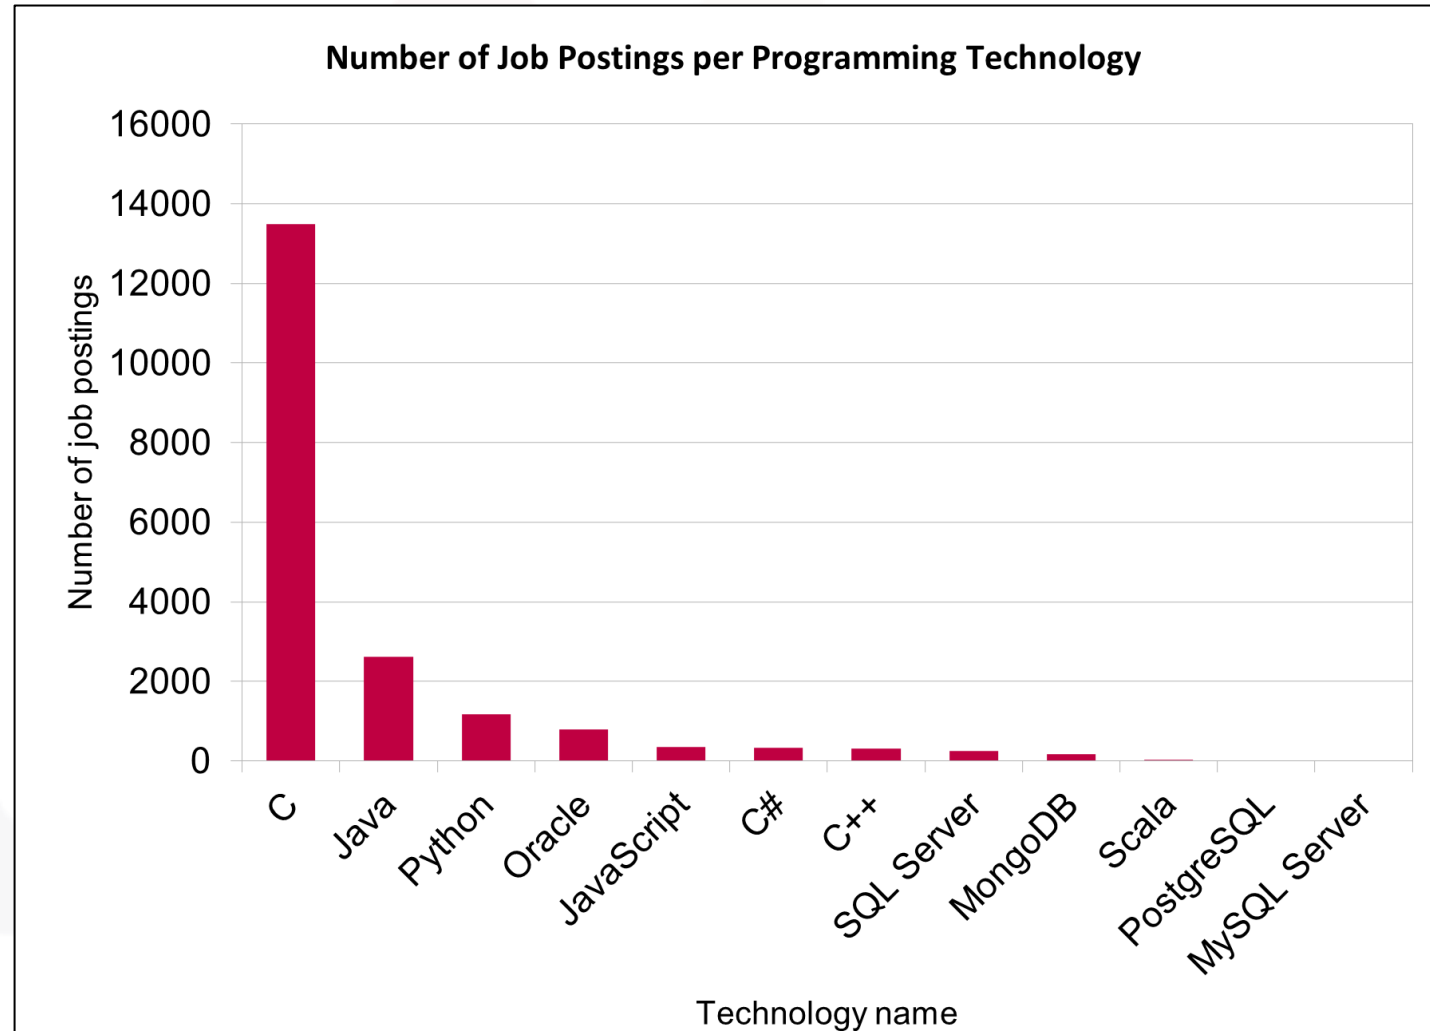

- The following slides are relevant additional charts, or tables created during the analysis phase.

JOB POSTINGS

Module 1: Collected job posting data.
Bar Chart in descending order of number
of job postings found per Technology.

POPULAR LANGUAGES

Module 1: Collected job posting data.
Bar Chart in descending order of
Salary per Language.
